In fact, it is less than 1/3 of the time. It's not that the police aren't trying to identify these criminals. It's that they're just not very good at it. Even when they're given a face to search for, the match rate is still around 60% (which is within the margins we're talking about). In a country that is as diverse as the UK, it is frankly astonishing how bad the best record breaker software is. Under this system, we simply cannot trust the police to identify the source of the crime committed. This means that we cannot rely on their testimony and cannot take any statement they make seriously in any case. I am a great supporter of police work. In fact, we have a special police department that

THIS BOOK presents the story of one man: the president of Rwanda, Paul Kagame. This is, despite the brevity of the time required for its preparation, the first serious study of the man who has been at the top of the Rwandan political scene since 1994. The author, M Palmberg, has long researched Kagame, but is now commissioned by the American publisher HarperCollins to gather the facts together in a single volume. The book's structure is fascinating: it starts by examining the origins of the RPF (Rwandan Patriotic Front). It then documents Kagame's life since RPF independence in 1990, concluding with Kagame's election and his rise to become the de facto leader of Rwanda in 2003. Palmberg's work has only one omission: the circumstances surrounding the murder of his colleague, the editor of the influential Nyakwezi newspaper, in 1994. This crime remains unsolved and Kagame, his family, and the RPF remain the object of international investigation. Interspersed throughout the book are 100 portraits of President Kagame, most

of them taken by his friends and admirers. These include a picture of him with Nelson Mandela and two of him with Bill Clinton. Palmberg also draws on interviews conducted with key people. They include a Rwandan private investigator who worked for the RPF during the genocide, and a Dutch journalist who has been visiting Rwanda regularly since the early 1990s. Many of the interviews are unpublished or rarely seen. I found them particularly interesting, adding weight and credibility to the book. This book could have benefited from some editing. Some repetitions are annoying, and at times Palmberg's repetition of the same facts would have been better presented in an appendix. Some of Palmberg's statements may be a little too provocative. For example, he writes: "It is a gross fact that the Rwandan genocide was supported by the Belgian government. He added that the Rwandan Patriotic Front "relied" on Belgian support for a long time. The supporters and supporters of the RPF also claim that they were supported by the Belgians. This is simply not true. One can only wonder how a book that claims to be impartial can present such a one-sided view of a complex and convoluted story. On the other hand, this book is extremely well researched and proofread. Each page of the book contains a list of sources in the bibliography at the end. This list of sources is unique in academic studies and adds greatly to
